

Curious DIY Kits School Partnership Program Info

Bring engaging and innovative projects to your classroom on a weekly or monthly basis. Our School Partnership Program provides educators with everything they need to deliver unique, creative hands-on projects to students.

- A program to support educators in a school setting to facilitate engaging, hands-on teaching and learning with Curious-on-Hudson curriculum and Curious DIY materials.
- Projects support integrated teaching of core subject areas in math, science, engineering, technology, and literacy.
- All teaching materials provided including online tutorials, classroom presentations and student assessments. *
- Program design can be aligned to support integrated curriculum goals
- Optional in-classroom or virtual teaching support
- Optional teacher training (live or via video)
- Available as classroom packs or individually packaged materials
- Bulk discount pricing for multiple grades
- On-going support and feedback during life of program
